PROJECTS

- **ABES Sync 800+ Downloads:** ABES sync is windows application for connecting system to college WIFI with single click , as in college everyone need to login on WIFI portal which is hectic and annoying task as first we need to search their portal manually then enter our lengthy credentials and most of the time typing error is made by students. But with ABES Sync we just need to save our credential once and can just connect to WIFI with one click ..
- **Swasthya Setu:** Small application through which a doctor can show his/her presence by scheduling clinic time which could help him get more patients and keep records online and also can send patient reports through it . Other side, Patient can book appointment to doctor prior to doctor closing time and can get his reports in report section , and patient can see his all the appointment in appointment section.
- **Achyuta:** Achyuta is a cutting-edge mobile application designed to revolutionize agriculture by predicting the most suitable crops based on the soil condition of the farm.
